HCV Care for People Who Use Drugs

May 30, 2017 By NVHR

Please join the Atlanta Harm Reduction Coalition, the National Viral Hepatitis Roundtable, the People's Harm Reduction Alliance, and the Urban Survivor's Union for a webinar on June 15th. The webinar will provide an update about the "More than Tested, Cured" project that addresses barriers to hepatitis C care faced by individuals who use drugs. In addition to a project update, we will have time for Q&A and discussion.

The Atlanta Harm Reduction Coalition will share its findings from conversations with providers who treat active drug users. The People's Harm Reduction Alliance will discuss its interviews with people who use drugs and their barriers to care. The Urban Survivor's Union will talk about the steps taken to prepare for conducting focus group sessions with stimulant users, women and other people who use drugs.

More Than Tested, Cured Project Update Webinar
Thursday, June 15, 2017, 2 pm Eastern
