Hepatitis Awareness Month: Possibilities

May 27, 2018 By Lucinda K. Porter RN

"I am not an optimist; I am a possibilist." ~ Hans Rosling

During Hepatitis Awareness Month, I am using Sundays as a day for reflection. Today's quote is from Hans Rosling, one of the most popular speakers in the history of TED. Rosling was a statistician who worked in public health in Africa. He died in 2017.

I don't think in terms of possibilities—I think in terms of certainty. I am certain we are creating a world free from hepatitis C and other forms of viral hepatitis. End of story.

What are you doing to help eliminate viral hepatitis? Tweet @hepatitismag.
