Facing the Facts about Hepatitis C

April 12, 2016

Baby boomers, or people born from 1945-1965, are five times more likely to have Hepatitis C. In this video PSA, diverse faces of baby boomers explain why those born during these years should get tested. The video ends with the call for baby boomers to talk to their doctor about testing, as treatments are now available that can cure Hepatitis C. For more information, visit CDC's Know More Hepatitis campaign website, www.cdc.gov/knowmorehepatitis.
