9 Month Post Treatment for Hep C Video Update

July 30, 2013 By Connie M. Welch

This is my 9 month Post Treatment for Hep C Video update. This week I have reached an important Mile Marker with completing triple therapy for Hep C using Incivek (telaprevir), Peg Interferon and Ribavirin.

It is hard to believe it's been 9 months since I completed treatment and now into recovery. Today I'm reporting my latest blood work results which includes the newest viral load test. Hope you will check out what is going on in my post treatment recovery.

Feel free to contact me if you would like to receive a free Hep C Warrior's Wristband. It is offered in two sizes, Adult (which is large), or Youth size (which is smaller).

Hope you have a great week! God Bless.

Love you guys,
Connie
