

November 3, 2014- Day 4

November 4, 2014 By [Kyle Jacobs](#)

Nothing much to report. Taking the Harvoni in the evenings after 8:00 PM seems to help with the odd feeling that I get about 20-30 minutes after taking it. However, I am still waking up at night between 1:00 AM and 3:00 AM. That is not normal for me although it does happen on occasion so I will continue to monitor. Labs are due back today so I will have updates on all of that tomorrow.
