

Hepatitis Awareness Campaign

April 30, 2017 By [Lucinda K. Porter RN](#)

[Blogging daily](#) in April in recognition of [National Donate Life Month](#). Please register as an organ donor and help to [raise awareness](#) about this lifesaving gift.

This is my last entry for April in recognition of [National Donate Life Month](#). Tomorrow is the first day of May and the beginning of [Hepatitis Awareness Month](#). Did you know that majority of patients who are on the liver transplant waiting list are there because of some type of hepatitis? Hepatitis is often preventable. You can help with disease prevention and reduce the need for organs by raising awareness. Educate yourself and others about the different forms of hepatitis. Talk to friends, family, and other associates about the critical need for donated organs. Be sure you register as an organ donor and help to [raise awareness](#) about this lifesaving gift.
