Hepatitis C Treatment Side Effects Stories

The possible side effects of hep C treatment often get blown out of proportion.

December 12, 2020 By Greg Jefferys

One of the things that people always worry about, when considering hepatitis C treatment, are the side effects of the medication used to treat hepatitis C.

The possible side effects of hep C treatment often get blown out of proportion when you do an internet search of hep C side effects because the small minority of people who have had bad experiences with the side effects of hep C treatment are the people most likely to post stuff about it.

People who go through their hep C treatment with minimal, or zero side effects, just get on with their lives and don't make a fuss.

In order to give people a real-world idea of exactly what the general experience of side effects are, I asked the members of my hep C support group for people to post their experiences of side effects during hepatitis C treatment.

Greg's blog is reprinted with permission, and the views are entirely his.
