November 12, 2014- Day 13

November 12, 2014 By Kyle Jacobs

Finally received my HCV viral load results back this morning from last Friday. The test was conducted one week after being on Harvoni. This was the third time my viral load had been measured. This was a very significant drop in seven days:

Component	Standard Range	1/7/2014	10/31/2014	11/7/2014
Hcv Rna Qnt Pcr	*<15 IU/mL*	146562	224994	172
Hcv Result				
Hcv Rna Quant Rt Pcr	*<1.18 Log IU/mL*	5.17	5.35	2.24

Everything appears to be going well. Has anyone else had their viral load measured soon after starting treatment?
