

# November 2, 2014- Day 3

November 2, 2014 By [Kyle Jacobs](#)

---

I adjusted the time that I took the medication to 8:00 PM last night which seems to have helped tremendously. I did wake up around 1:00 AM and was awake until around 2:00 AM. A glass of water and a little television helped get me back to sleep. I woke up at 6:00 AM feeling rested and not fuzzy and out of it which is what I felt the previous two days when I took the dose in the afternoon. I will continue with this schedule for the next few days and monitor how it goes. I have a busy schedule today with work so I will see how my energy levels are throughout the day. I would like to hear from others about their experiences taking Harvoni?
